

# SOWER'S KIDS 2016 IN PICTURE REVIEW

Jan. 2015 1st room with Kenya style blocks, 4 more rooms done with new style blocks.

George's vision of Sower's Kids property also being a school requires an on base toilet-shower building. I was there Oct. 2015 to oversee installation of septic tank and drain system, and start of the building with the water piping. I left finishing the plumbing and the walls for the 8 toilets & 8 showers. This year they built the outside walls & roof. And to the right you see the tile work presently in process.

April was moving day from 1 room they all ate and slept in, to large spacious living rooms, one for girls and one for the boys.

### The Treasures - The Kids

Sower's Kids home presently has 5 girls, 11 boys, between 8 and 16 years old. Three of the older children are being sponsored at a boarding school. Two of them went from the streets to school, and they love it. The S.K. home grows many of their own veggies and have their own chickens - you can see little chicks with a couple of kids.

Blessings to all of you from AI, Norma, and George, Giving life and hope to one treasure at a time.
